Full Stack Engineer building reliable production platforms, data systems, and scalable user workflows

EXPERIENCE

Lead Engineer - Research Initiative (Full-Time)

Feb 2023 - Dec 2025

Saint Louis University - \$2M Initiative

St. Louis, MO

- Shipped prototype into production platform used across web and mobile clients.
- Scaled platform to 500 concurrent users and 1,000 sessions at peak load.
- Architected full-stack platform spanning auth, databases, APIs, and deployment.
- Built production classification service with rate limits and user-level safeguards.
- Cut load time 50% through caching, batching, lazy loading, and pagination strategies.
- Sustained 100% uptime during reporting period; CI/CD runs in 5 minutes with 100 automated tests gating deploys.

Software Engineer - Research Collaboration (Part-Time)

May 2025 - Oct 2025

University of Missouri - St. Louis

St. Louis, MO

- Built production APIs in Node.js and Express supporting 200+ active users.
- Cleaned and indexed 1,000+ records, cutting query latency from 10ms to 5ms.
- Integrated Google Maps routing supporting navigation across Missouri locations and addresses.

Software Engineer (Full-Time)

Jan 2021 - Jul 2022

Eezee Business Machines

Mumbai, India

- Developed dashboards and APIs supporting real-time IoT device platforms.
- Defined API contracts used across production web and mobile applications.
- Sustained reliability via monitoring, alerting, and automated CI pipelines.

PROJECTS

Where's Religion - React Native, Next.js, Firebase, AI

Feb 2023 - Dec 2025

- Production platform serving 2,000+ users across iOS/Android/web with shared data models and synchronization logic.
- Deployed Firebase authentication and designed cross-platform architecture enabling consistent user sessions across clients.

Missouri Crossroads - Next.js, AWS, APIs (Collaborative Research Platform)

May 2025 - Oct 2025

- Built independent full-stack platform designed for future integration with university research ecosystems and collaborations.
- Architected AWS-backed stack (Auth, S3, APIs, Maps) and curated dataset of 1,600 entries (700 museums, 300 artifacts, 600 monuments).

International Information Assistant - Next.js, TypeScript, AI

Oct 2025 - Nov 2025

- Developed AI travel assistant handling transit/visa queries for 200+ countries with 5-10ms response time.
- Implemented single-call inference workflow using OpenAI API to generate structured decisions and explanations.

Bhatia-Buzz - React Native, TypeScript, Firebase, Playwright

Mar 2026

- Built community app with request workflows, moderation, offline feeds, and Firebase services.
- Added Playwright E2E coverage across auth, navigation, profile, and request flows.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL

Frameworks: React, Next.js, React Native, Node.js, Express

Databases: PostgreSQL, MySQL, MongoDB, Firestore, Redis

AI: LLM integration, prompt engineering, classification pipelines

Cloud/DevOps: AWS, Firebase, Docker, CI/CD, GitHub Actions, Jenkins

Testing/APIs: REST, OpenAPI, GraphQL, Jest, Playwright, JUnit

EDUCATION

Saint Louis University

M.Sc. Computer Science

Aug 2022 – May 2024

St. Louis, MO
